

Accessories for all Bebcu Pressurization Units

BPCN Description

Model BPCN Building Pressurization Caution Nameplates are for attachment to any exterior door of a building which utilizes Bebcu Pressurization Units. The BPCN cautions users that the building is pressurized and that the door must be firmly secured after entering and exiting. The nameplate also warns against leaving the door open unless the area is known to be free of flammable materials or unless all unprotected devices have been deenergized. In addition, it requires that the atmosphere inside the building be determined non flammable by use of a flammable vapor detector before power will be restored. These nameplates alert personnel that a Bebcu Pressurization Unit is being utilized to reduce the hazardous (classified) rating within the room or building from Class 1, Division 1 or 2 to nonhazardous, in accordance with NFPA 496, Chapter 5.

SDWN Description

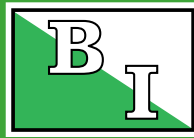

Model SDWN Sealed Door Warning Nameplates are for attachment to any exterior door that normally remains closed, on buildings that utilize Bebcu Pressurization Units. The SDWN warns against opening the door without permission of the operational management authority except in the event of a life threatening emergency, unless the surrounding area is known to be free of flammable materials or unless all unprotected devices have been deenergized.

Important Note

The NFPA currently defines "openings (doors) capable of being opened" as an opening which penetrates the surface of any wall, floor or ceiling of the pressurized building, with no exceptions. Bebcu recognizes the right of the AHJ (Authority Having Jurisdiction) to take exception to this definition. These exceptions include restricted accesses such as emergency escape exits or doors used only for installation of large equipment, if they are secured under normal operating conditions with a throw bolt or emergency exit panic bar and are properly labeled with Bebcu's SDWN-1 Sealed Door Warning Nameplate.

Material Specifications

BPCN-1 Dimensions:	6.5" W x 3.75" H
SDWN-1 Dimensions:	6.5" W x 3.75" H
Mounting Holes:	0.125"
Adhesive Backing:	3M #467 Pressure Sensitive
Material:	Polished 316 SS
Finish:	Baked Enamel
Hole Centers:	6.325"
